

Crockery & Cutlery Policy

We're committed to reducing our carbon footprint and doing 'our bit' for the environment, wherever possible. So, we're proud to have teamed up with Vegware to offer **eco-friendly crockery** for all our event's.

Please note that our "3 Course Sit Down" will be served on chinaware as standard.

If you would like to 'upgrade' your event to full china and silverware there is a charge of **£1 +VAT pp**; *based on a minimum of 25 guests.*

Why plants, not plastic?

RENEWABLE

Vegware is made of plants, not plastic. Why use up finite resources – trees, corn and sugarcane are renewable natural materials.

LOWER CARBON

Making plant-based materials emits less carbon than making most plastics. And our Eco Audits count your carbon savings by the kilo.

RECYCLED

We love recycled card and paper. Our Eco Audits track the recycled content in each order - together we're saving virgin materials.

SUSTAINABLY SOURCED

Any virgin card or paper used to make Vegware products come from a responsible forestry source with a recognised chain of custody.

Tried, tested & trusted

CERTIFIED FOOD SAFE

We hold the market's most comprehensive food migration certification.

CERTIFIED COMPOSTABLE

Vegware products have independent compostability certification and are widely accepted for commercial composting.

TRACEABLE SUSTAINABLE SUPPLY CHAIN

We are proud of our sustainable supply chain. Our fully traceable products are made in quality-controlled conditions from sustainably sourced or recycled materials. Minimising waste and maximising transport efficiency give benefit all round.
